BENEFITS

- ✓ Solid center rib improves steering response while reducing noise.
- ✓ Four wide, notched circumferential grooves offer resistance to hydroplaning, while improving snow

PERFORMANCE FEATURES

Here's how this tire performs in everyday driving.

and soft-surface traction.

- ✓ High density “zigzag” sipes enhance wet traction and winter performance on snow and ice while maintaining tread element rigidity.
- ✓ Semi-closed shoulder design (exclusive notched shoulder rib) to provide long, even wear and increased cornering performance while also reducing noise.
- ✓ Variable tread block pitch sequence reduces noise for a quiet ride.
