BENEFITS

- ✓ "ARMOR-TEK3®" Carcass Protection provides 50% more protection against impact damage than standard 2-ply tires.
- ✓ The inner tread ribs alternating 3-2 pattern provides

PERFORMANCE FEATURES

Here's how this tire performs in everyday driving.

DRY TRACTION	WET TRACTION
-----------------	-----------------

a number of significant performance benefits like:
reduced road noise, increased stability and handling, superior soft surface (trail) and mud traction.

- ✓ The “flex groove” provides a smoother ride by helping to dampen the impact generated by inconsistencies in pavement, potholes and gravel.
- ✓ The Discoverer STT PRO features large, specially-designed cleats of rubber (side biters) on the shoulder area of the sidewall, to enhance traction and grip.
- ✓ The asymmetrical scallops on alternating lugs direct mud into the mud scoops to allow the tire to pull through muddy terrains with ease.
