

# ZIEX ZE912

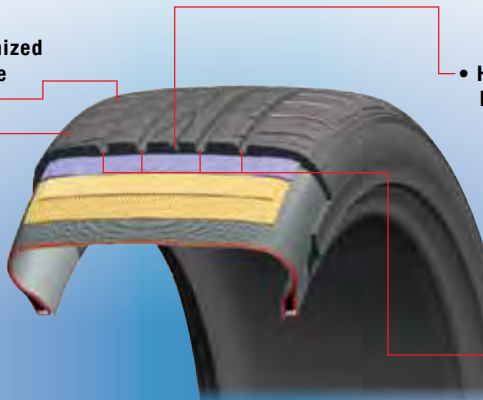

Imagine an all season performance tire designed to offer true grip and increased traction that ultimately advances driver confidence whatever the weather condition. With the ZIEX ZE912, Falken has developed a tire with full-depth sipes encircling the tread, coupled with high-volume circumferential grooves and high angle variable cross grooves, that brings together the spirit of performance driving in all climates. When faced with wet conditions, the ZIEX ZE912 features increased hydroplane resistance and increased tread stability by evacuating water away, delivering improved grip composure, while its hybrid-asymmetric pattern produces better dry performance and genuine touring confidence during each and every season. The result is a tire that performs regardless of the condition of the road.

## ALL SEASON PERFORMANCE TOURING

- **Hybrid-Asymmetric Pattern Design** – Optimized inside and outside tread patterns to ensure all-season grip on demand
- **Infinite Sipe Sequence** – Full-depth sipes throughout the entire tread platform creating biting edges that dramatically increase traction in all seasons
- **Mileage Warranty** 65,000 miles for the 60/65 series and 40,000 miles for 35 through 55 series

- **High Angle Variable Cross Grooves** – In inclement weather conditions, these grooves effectively evacuate water away from the contact patch
- **Rotation Wear Indicators (RWI)** – Falken engineered visual cues that help the driver maximize tire life and overall tire value, prompting regular tire maintenance
- **Four High-Volume Circumferential Grooves** – Designed to deliver increased hydroplane resistance and maximum stability in wet conditions
