Maximum Off-Road Traction

FEATURES

Variable Pitch Design: Variable angle tread blocks help reduce harmonics to reduce road noise while also providing biting and traction surfaces in all directions.

Aggressive All-Terrain Tread: Large lugs and open void ratio enhance grip for better control in the toughest off road conditions while providing a large and stable contact patch for better on road characteristics.

Durable Sidewall: The unique 3-ply sidewall reinforces the structural integrity of the Kanati Mud Hog for greater puncture resistance. The sturdier construction digs into softer terrain for better traction and performance.

Severe Weather Capable: Generous siping and grooves allow for better water evacuation and snow traction. The Kanati Trail Hog sports the Alpine/mountain snowflake severe snow service symbol certifying it as a winter capable tire with year round

application.

THE TRAIL HOG EARNS ITS MOUNTAIN / SNOWFLAKE RATING WITH ITS EXCELLENT PERFORMANCE IN SNOW TESTING
