Performance ratings scale is 1 to 5, with 5 being the best.

FEATURES AND BENEFITS

SYMMETRIC TREAD DESIGN

- Enables cross rotation to reduce irregular wear.
- Improves all-season traction and tire life.

OPTIMIZED CENTER BLOCK ARRANGEMENT

- Variable-pitch angles provide good road contact for increased ride comfort.

FOUR WIDE CIRCUMFERENTIAL GROOVES AND VARIABLE PITCH CHANNELS

- Evacuates water to improve wet traction.

SHOULDER RIB

- Minimizes irregular wear.
- Increases stability.

MULTI-WAVE SIPES

- Minimizes irregular wear for longer tread life and a smooth, quiet ride.
- Improves snow traction.

Immediate Ride Improvement

I recently replaced all four tires on my 2005 Ford Ranger with these Extensa A/S. They came highly recommended by my dealer.

As I drove away home I noticed a large reduction in road noise. My truck also felt more nimble, but still in control - not at all squirrely.

The real test came today. I had to pull my 4x6 ft enclosed trailer about 300 miles in the rain. The trip went without incident and took much less effort. Absolutely no wrestling my way down the road.

One thing I noticed as my tires were mounted and balanced. One tire required no weights. The other three each required one of the smallest weights they make to set things right. That shows excellent attention to detail by the person assembling these tires.

This is my first set of Toyo tires and I have under 400 miles on them. I'm very impressed so far.

Yes, I recommend this product.

Noisy

I had a set of Versado Noir on my car. I felt they lacked a feel of the road so I exchanged them for Extensa a/s. BIG MISTAKE!! The Extensas are very noisy. You hear and feel every place in the road. I wish I had the Versado Noir back. This is my fifth set of Toyo tires and I have always been happy with the product. However, this will probably be my last set.

Belts keep breaking

After 33,267 miles had to replace tire with broken belt. "under warranty" still charged me 43.27 plus 15.00 spin balance. The tires were 75.75 each when I purchased them new, and they only charged me 8.00 each to balance them. Now another tire is wobbling same as first tire. Another broken steel belt at 42,620 miles. These tires have 65,000 mile warranty that's for tread wear. I always take tires at same tire center for rotation. I don't like these tires only because belt problem.

HELPFUL 1 3

2001 Lexus LS430 270,000 miles

(65,000) miles put on these tires, and not a problem one. Purchasing two new front tires. Rotated the front to the back, I am trying to push the rear tires until the fall of the year. Then rotate the new ones to the rear of the car, 2.5 hours daily commute. I think these are the best tires, I have ever purchased "passenger car tires." I hope Toyo keeps the price reasonable and the quality at the same standard.

Yes, I recommend this product.
